AXSON BUYS NANOLEDGE, TELESYSTEM'S "HIGH PERFORMANCE RESIN" BUSINESS

I am pleased to announce that we have signed today the definitive agreement to acquire Nanoledge's high performance resin business from Telesystem in Canada (www.nanoledge.com).

This represents a significant step in Axson strategy to invest into innovation to be deployed in our existing business units.

Nanoledge, is an innovative startup focused on the high performance epoxy market. Nanoblending combines base resins with a variety of nanoparticles and selected chemical additives in order to target specific mechanical, electrical or thermal performance improvements. It has significantly improved composite material performance through its proprietary nanoblending technologies.

Beyond improving AXSON product performance in existing markets, this technology will also be a key element to AXSON's further development in new expanding markets.

Charles Churet
Chief Executive Officer
AXSON group

AXSONは、Telesystem(カナダ)の高機能樹脂部門Nanoledgeを買収したことをお知らせします。

Nanoledgeは、高機能エポキシ市場に傾注して革新的な製品を開発してきました。ナノレベルの物質(カーボンナノチューブなど)と添加剤を高度な化学的分散混合技術によってそのベースレジンに添加することで特異な機械特性、電気特性に加え優れた耐熱特性を改善することに成功しました。

従来のAXSON製品に加え、新たな市場を開拓するための鍵となる技術であり、更なるAXSONの発展に寄与するものと思います。
